ABSTRACT

The result of a comprehensive search for documents about ERIC, this bibliography lists 269 entries which approach ERIC in several different ways, e.g., documents of historical interest in the development of the system; "how to" items designed to initiate the user into the system; user surveys; evaluations of ERIC performance; reports describing particular computer search programs or efforts; ERIC in the context of educational R&D dissemination; reviews of ERIC practices or results; how to teach ERIC; ERIC thesaurus development; how ERIC relates to some subset of the educational community; ERIC and microforms; and ERIC's current attributes, including size and products. Each item was reviewed and screened for suitability; those that were simply news announcements were eliminated, as were items of poor quality, bibliographies based on ERIC accessions but without other relevance, repetitive brochures, and general material on dissemination of educational R&D without significant ERIC connection. Brief annotations are provided as needed to augment the titles, and ED (ERIC Document) and EJ (ERIC Journal) numbers are cited when available. (Author/BBM)

ERIC® BIBLIOGRAPHY

Introduction

The Educational Resources Information Center (ERIC) began operations in 1964. Since that time, there has been a steady production of literature about ERIC. These materials approach ERIC in several different ways, e.g. documents of historical interest in the development of ERIC; "How to" items whose object is to initiate the user into the system; user surveys; evaluations of ERIC performance; reports describing particular computer search programs or efforts; ERIC in the context of educational R&D dissemination; reviews of ERIC practices or results; how to teach ERIC; ERIC thesaurus development; how ERIC relates to some subset of the educational community; ERIC and microforms; ERIC's current attributes, size, products, etc.

These materials are of interest from several points of view. They will often answer a user's question about ERIC; they are essential to any studies of ERIC; some are appropriate to classroom use in the teaching of ERIC; they are indicative of what is considered worth writing about within ERIC.

Given these uses, ERIC has attempted to maintain some degree of bibliographic control over the more substantive materials. This bibliography represents the result of a comprehensive search for documents about ERIC. Each item has been obtained in microfiche or hardcopy and screened for suitability. Items that were simply news announcements have been eliminated, as have items of poor quality, bibliographies based on ERIC accessions (but without other ERIC relevance), repetitive brochures explaining the well-known basic facts about ERIC, and general material on the dissemination of educational R&D, but without sufficient ERIC connection.

The 269 entries are arranged alphabetically by personal author. Corporate author or title are used in the absence of a personal author. Brief annotations are used, when appropriate, to augment the title. Accession numbers (ED for items in *Resources in Education*; EJ for items in *Current Index to Journals in Education*) are cited whenever available.
